

Foot Valves — Product Variant Table

Foot valves are non-return valves fitted at the suction end of a pump's intake line to retain priming water and stop the suction line draining back when the pump stops. An integral strainer screen guards the pump against debris ingress. Standard fitment on borewell, sump and open-source suction lines in water supply and irrigation systems.

Type	Body / Disc / Ball	Disc Face	Body Seat	End Connections	Standard	Test Pressure	Size Range (NB)
Lift Type / Swing Type / Ball Type	Lift/Swing: Cast Iron IS 210 Gr. FG 200/260/WCB Ball type: SS or Rubber-coated wood ball	Nitrile Rubber	Stainless Steel / Gun Metal	Flanged, 50 mm and above	IS 4038	6 kg/sq.cm	25 – 450 mm
